

Tourette Syndrome Study

Does your child have symptoms of Tourette's syndrome like making sudden, repetitive movements or sounds, also known as tics?

Tics may include:

Motor Tics

Eye blinking
Twitching
Head jerking
Foot stamping

Verbal Tics

Throat clearing
Clicking sounds
Shouting
Grunting

Please contact CRI Worldwide to learn about a research study of an investigational medication for Tourette Syndrome.

Who is eligible to participate?

- Children 8-16 years of age
- Children with symptoms of Tourette's syndrome
- No health insurance is needed

What do study participants receive?

- All study-related evaluations and study medication at no cost
- Qualified participants may be compensated up to \$1,450 for their time and travel

CRI Worldwide is dedicated to furthering an understanding and preventing pediatric diseases and making these therapies available to all children.
